

Hint: A distance of at least 0.50m has to be observed to the PV modules!

snow guard raising element for snow guard system M 1:5

- Hint:**
- A finished snow guard raising element holds three snow guard pipes and needs two snow guard brackets. When refitting an old building please order it dependently. The distances of the snow guard row according to our 'manual for planning and Installation' can be increased by 50%.
 - Snow guard brackets mustn't be installed directly in the area of the fixing element so that a length expansion of the profiled sheet's is guaranteed.
 - Tightening torque for screws 20 Nm.
