

CURVED VERGE

A roof termination that is made to be seen! Especially for smaller roof radii and buildings with special visual requirements, Zambelli offers a particularly appealing variant. Instead of a polygonal design with short lengths, individual rounded segments of the verge termination correspond precisely to the radius of the roof construction.

YOUR BENEFITS

- ▶ Visually appealing design
- ▶ High-quality and accurate workmanship
- ▶ Timesaving assembly
- ▶ No on-site mitre cuts are required

TECHNICAL DETAILS

- ▶ Single segments in roof-specific radius
- ▶ Segmental design
- ▶ Individual processing of the fastening
- ▶ The same surfaces and materials as for RIB-ROOF
