

RIB-ROOF VERGE TERMINATION

By providing roll-formed termination flashings for verge, Zambelli RIB-ROOF has expanded its range of products, which will appeal both to installers and architects.

Reducing the amount of material and time required for the assembly emphasizes the concept of sustainability to a great extent. At the same time, an accurate, bespoke division and installation of the entire RIB-ROOF covering area can be implemented according to the structural conditions.

YOUR BENEFITS

- ▶ Architecturally appealing verge design
- ▶ Continuous one-piece and combined RIB-ROOF and verge profile sheeting
- ▶ No transverse joints are required
- ▶ Simple and economical installation
- ▶ Sustainable solution as a result of resource conservation

TECHNICAL DETAILS

- ▶ Material design analogous to RIB-ROOF
- ▶ Individual construction width, also available as „fitting sheet“
- ▶ Low verge flashing with a roof runoff edge
- ▶ Stopping plate according to the project-related requirements
