

Photovoltaic on RIB-ROOF

SUN ON THE ROOF. MONEY IN YOUR POCKET.

RIB-ROOF metal roofing systems pay off in many ways. In combination with a photovoltaic system your building will be profitably upgraded to a power station. For each of our metal roofing systems we offer a solution which suits the roof shape and the orientation of the building.

Irregular changes in subsidies under the Renewable Energies Act (EEG) are unsettling for the solar market. So, it is reassuring that the original Zambelli solar system accessories guarantee certainty. With regard to common warranties for all technical functions, you are on the safe side using the system which offers a consistently accurate fit and sliding capacity.

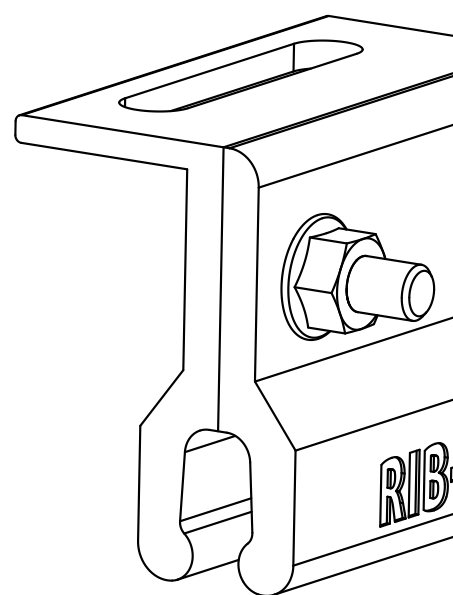

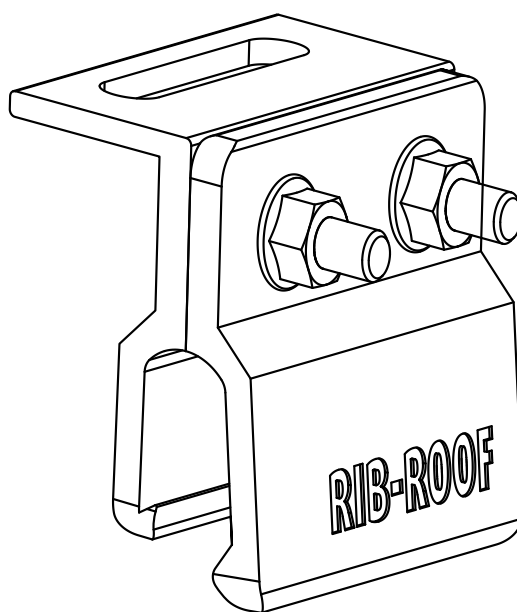

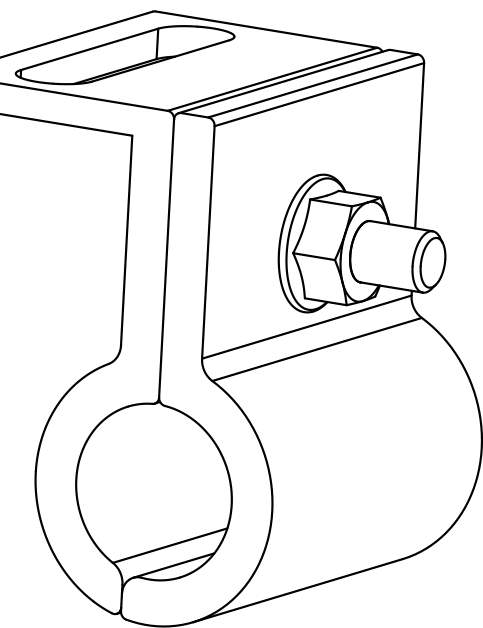

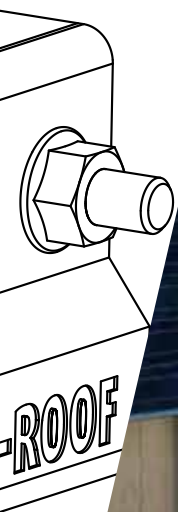

PRACTICAL & ECONOMICAL

ZAMBELLI SOLAR BRACKET.

As far as the roof-parallel or raised module mounting systems are concerned, our system-supplied solar brackets are a cost-efficient and quick method of module installation. Whether a new construction, a renovation or retrofitting, we would be glad to demonstrate you – without any obligation on your part – how you can make the most of your roof.

As a new development, Zambelli now offers enhanced, more efficient solar brackets with an integrated mounting angle with a total construction length of 80 mm!

SIMPLE, FAST & RELIABLE

SOLAR PIPE & SOLAR PIPE BRACKET.

Zambelli offers now the complete RIB-ROOF solar system together with the multifunctional solar pipes and tested brackets.

Your benefits at a glance.

System.

Coordinated and tested system
