

FROM CONCEPT TO INSTALLATION
LIBRARY FACILITY

Our company philosophy, „Ich mach’s einfach“ („make it easy“), has always been at the heart of everything we do. We develop superior solutions that make things easier for our customers. That’s why our partners can rely on us completely.

Embracing Change with a Clear Vision.

Growing collections, evolving communication channels and the increasingly important role of libraries in public life are reshaping the way libraries operate. Flexibility and openness are essential if libraries are to continue playing their vital role in society. Structural, spatial and functional changes are no longer optional—they are both a challenge and an opportunity.

Zambelli Library Furnishings supports academic and public libraries as they adapt to changing requirements and continue to evolve. We help you create a library environment that overcomes existing challenges while unlocking new opportunities. Our proven furnishing solutions combine safety, functionality and lasting quality.

As specialists in library furnishings, we design, manufacture and install creative, functional interior concepts tailored to your needs. The following pages introduce the versatility of Zambelli’s furnishing systems and the comprehensive range of services we provide.

Zambelli library shelving systems for academic and public libraries.

The right solution for every space

Zambelli library shelving systems are designed to meet the requirements of any library space. At the heart of our product range are our in-house developed and manufactured shelving and cabinet systems for books and media collections. Our modular systems can be tailored in terms of size, configuration, design and accessories to suit your specific requirements. Complemented by additional products and bespoke solutions, they enable us to provide everything you need for a fully functional library.

Open access area

We offer a range of solutions for:

- ▶ Presenting library collections
- ▶ Flexible space planning
- ▶ Communication areas and quiet study zones
- ▶ Lighting and room ambience

Zambelli solutions:

- ▶ Stationary and mobile shelving systems
- ▶ Acoustic solutions
- ▶ Custom colour concepts and material combinations
- ▶ Coordinated range of accessories
- ▶ Labelling and wayfinding systems

Reading and communication areas

We offer a range of solutions for:

- ▶ Cloakroom
- ▶ Returns area
- ▶ Circulation desk
- ▶ Exhibition areas
- ▶ Browsing area

Zambelli solutions:

- ▶ Reading and study spaces
- ▶ Locking systems
- ▶ Custom-made solutions
- ▶ Lounge furniture

Library stacks

We offer a range of solutions for:

- ▶ Books
- ▶ Magazines
- ▶ Non-book media
- ▶ Manuscripts
- ▶ Archive boxes and storage boxes
- ▶ Prints and photographs

Zambelli solutions:

- ▶ Mobile and stationary shelving systems
- ▶ Closed-stack storage
- ▶ Space management and energy-saving concepts
- ▶ Open-stack storage
- ▶ Climate control and energy-efficient solutions

Supplementary areas

We offer a range of solutions for:

- ▶ Collection display
- ▶ Storage for personal belongings
- ▶ Lighting and room ambience

Zambelli solutions:

- ▶ Display units
- ▶ Display cases and cabinets
- ▶ Lighting concepts

PROJECT MANAGEMENT.

Bringing projects to success.

Every library project begins with a thorough understanding of the space, the people who use it and the ideas that shape it. Assessing different spatial requirements, consulting with stakeholders and developing the right concepts are all essential parts of the planning process. What do we bring to keep your project on track? Practical experience, a collaborative approach and the flexibility to respond quickly. We support you from the earliest planning stages with reference projects, CAD drawings and, where required, prototype installations. Together with you, we define the level of quality best suited to your individual project.

Our close relationships with libraries provide valuable insights and fresh perspectives. As planning progresses, our in-house manufacturing expertise gives you greater confidence through realistic assessments of budgets and project schedules.

With Zambelli, you benefit from the experience of a specialised, medium-sized company dedicated to library shelving systems.

Planning, configuring and adapting.

Zambelli makes it easy for you!

To ensure your library meets your objectives, you can rely on Zambelli at every stage of your project. As your partner, we offer a comprehensive range of services to support you throughout the entire planning and implementation process.

- ▶ Development and presentation of furnishing solutions based on the specific site conditions
- ▶ Consulting partner for architects and planning teams
- ▶ Guided visits to reference projects
- ▶ Initial cost estimates for budgeting purposes
- ▶ Review of floor plans and support in determining space requirements for library stack areas

- ▶ Assessment and evaluation of existing library collections
- ▶ Interior design proposals for library spaces
- ▶ CAD visualisations to illustrate the design concept and overall library ambience
- ▶ Planning in compliance with all relevant standards and regulations (e.g. DIN 67700)

- ▶ Participation in regular project coordination meetings
- ▶ Coordination of the complete installation of the library shelving systems with related trades
- ▶ Full-service installation management on request
- ▶ Installation of temporary storage solutions to protect valuable library collections during the construction phase

- ▶ Extended warranty services
- ▶ Periodic shelving inspections in accordance with DIN EN 15635
- ▶ Guaranteed product availability

ZAMBELLI PRODUCT RANGE

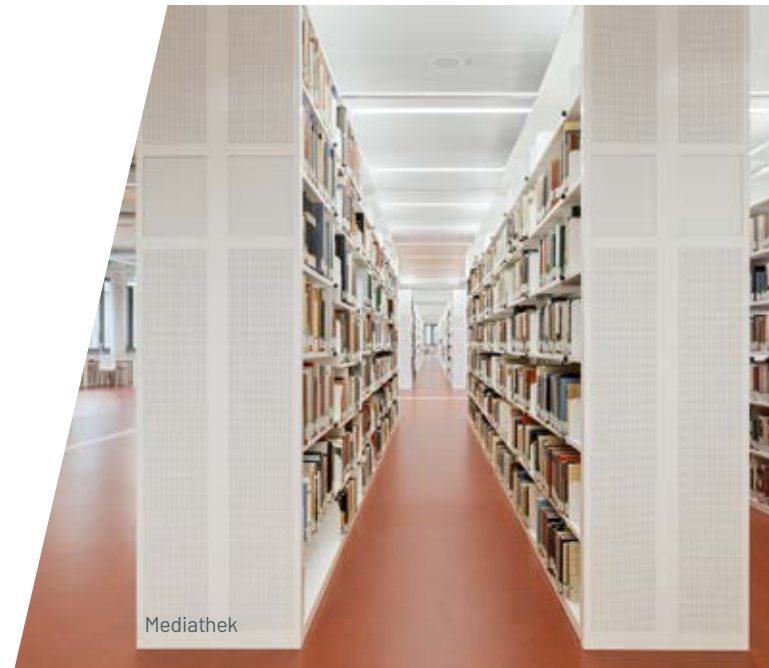

We make your library a place to connect.

Attractively designed libraries have the power to bring people together. With Zambelli library shelving systems, you can create the space needed for your book and media collections while providing an inviting environment for people, learning and culture.

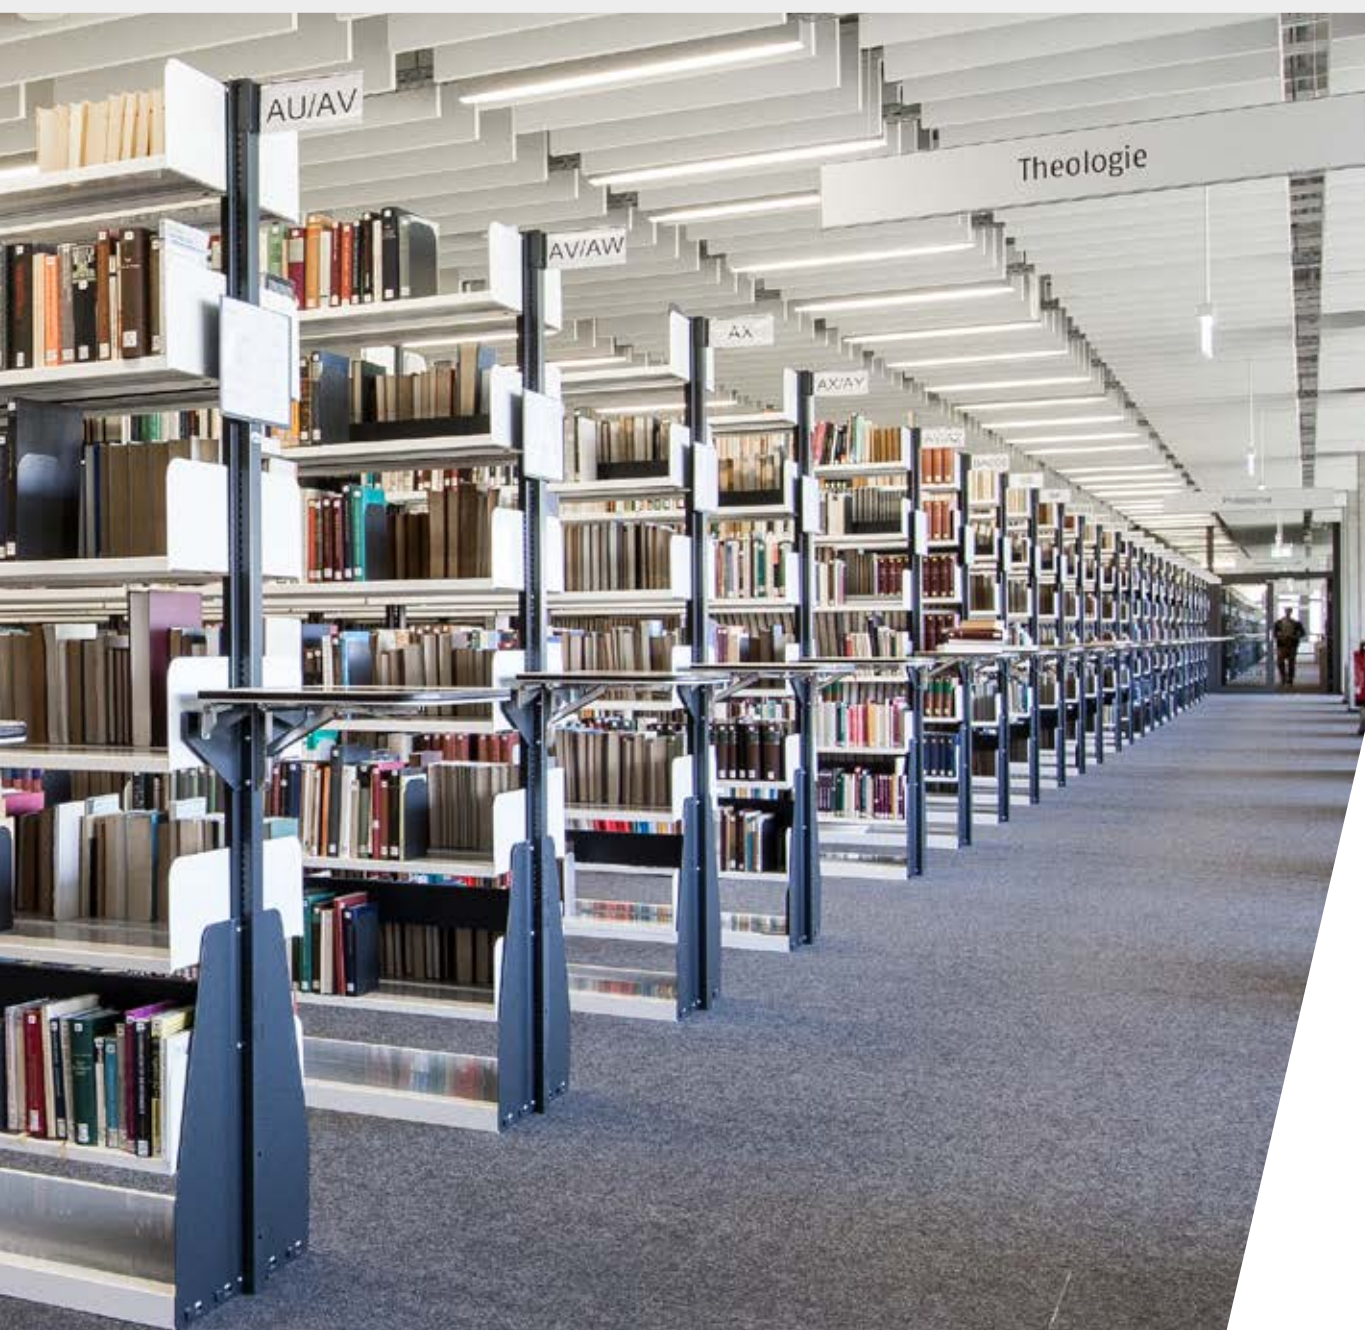

Three product ranges. Each offering a complete solution

Our three shelving systems – Mediathek, ARthek and Maxithek – give you the flexibility to realise virtually any library design concept. All Zambelli systems are based on proven steel construction. Their modular base and add-on components can be configured and expanded to meet your specific requirements. The choice of system depends on the type of books and media to be stored, as well as the functional requirements of your library. A variety of end panels and finishes creates a harmonious overall appearance, while a wide choice of colours, surface finishes and design elements allows the shelving systems to integrate seamlessly into your interior design.

- MEDIATHEK
- ARTHEK
- MAXITHEK

ZAMBELLI MEDIATHEK.

Mediathek – features & benefits.

Mediathek is the ideal shelving system for book-focused libraries. Its centre-post construction enables space-saving and flexible book storage. The open design, adjustable shelf pitch and robust shelf construction ensure excellent air circulation, efficient use of space and easy reconfiguration of the shelving. Regardless of book format or size, Mediathek always provides the right storage solution. The system combines functionality with attractive design and offers a wide range of customisation options to create an appealing and efficient library environment.

Highly stable centre-post construction

Available as base and add-on units for single-sided and double-sided configurations

- ✓ High storage capacity
- ✓ Modular and easily expandable
- Durable, even in high-traffic environments

User-friendly shelf adjustment

Gap-free, detachable clamp connection between side shelves and support rails

- ✓ Tool-free shelf adjustment, even under load
- ✓ Guide rails on both sides with indexing marks
- Gap-free design prevents book covers from being trapped

Modular shelving system for libraries

Available in a wide range of shelving widths, heights and configurations

- ✓ Suitable for both open-access areas and library stacks
- ✓ Adaptable to the surrounding space and building layout
- Can be converted into a mobile shelving system at any time

Specifications

- ▶ Shelf load capacity of up to 70 kg
- ▶ Increased load capacity available with shelf reinforcement
- ▶ Bay load capacity of up to 600 kg
- ▶ Shelves available in steel or wood
- ▶ Shelf adjustment grid 15 : 15

Accessories, design and color options can be found from p. 22 onwards

ARthek – features & benefits.

ARthek is a library shelving system that combines distinctive design with a high degree of individuality. Its elegant steel frame construction can be customised to create the perfect setting for high-quality book collections. The slender steel frame components provide outstanding load-bearing capacity while maintaining a refined appearance. ARthek gives you the freedom to create a unique library environment by tailoring design details to your individual requirements. A choice of steel, wood or glass for shelves and other elements offers even greater design flexibility.

Highly stable steel frame construction

Available as base and add-on units for single-sided and double-sided configurations

- ✓ High storage capacity
- ✓ Modular and easily expandable
- ✓ Durable, even in high-traffic environments

User-friendly shelf adjustment

Shelves with clip-on end profiles or shelves with internal support bars integrated into the frame

- ✓ Tool-free shelf adjustment
- ✓ Indexing marks

Modular shelving system for libraries

Available in a wide range of shelving widths, heights and configurations

- ✓ Suitable for both open-access areas and library stacks
- ✓ Extensive design options
- ✓ Can be converted into a mobile shelving system at any time

Specifications

- ▶ Shelf load capacity of up to 70 kg
- ▶ Increased load capacity available with shelf reinforcement
- ▶ Bay load capacity of up to 600 kg
- ▶ Shelving bays with side frames
- ▶ Shelf adjustment grid 15 : 15

Accessories, design and color options can be found from p. 22 onwards

ZAMBELLI MAXITHEK.

Maxithek – features & benefits.

Maxithek is a versatile library shelving system designed for projects of any size. Whether you are expanding an existing library or planning a new installation, Maxithek provides an economical and flexible solution. Its classic design, featuring a robust frame made from profiled steel, meets the requirements of virtually any library. A range of end panels and finishes allows the shelving system to be tailored to complement your individual interior design.

Highly stable frame construction with specially profiled steel sections

Available as base and add-on units for single-sided and double-sided configurations

- ✓ High storage capacity
- ✓ Modular and easily expandable
- Suitable for double-tier installations

User-friendly shelf adjustment

Four internal shelf supports

- ✓ Tool-free shelf adjustment
- Dimensions matched to all standard book and journal formats

Modular shelving system for libraries

Available in a wide range of shelving widths, heights and configurations

- ✓ Suitable for both open-access areas and library stacks
- ✓ Infinitely adjustable floor levelling
- Can be converted into a mobile shelving system at any time

Specifications

- ▶ Shelf load capacity of up to 100 kg
- ▶ Increased load capacity available with shelf reinforcement
- ▶ Bay load capacity of up to 600 kg
- ▶ Shelves with folded edges on all sides
- ▶ Shelf Adjustment Grid 20:20

Accessories, design and color options can be found from p. 22 onwards

ECONOMIC ASPECTS.

Save costs.

Mobile shelving systems always pay off.

Floor space is expensive. Rental costs in cities and metropolitan areas continue to rise, while utility expenses such as electricity, heating, and building insurance are also increasing. So how can you reduce the space required for your archive while lowering costs? Our recommendation: choose Maxithek mobile shelving systems and benefit in more ways than one. You can reduce your floor space requirements by up to 50%, increase your archive capacity by at least 100%, enjoy outstanding ease of use, and ensure that your archived materials are protected at all times.

Increase efficiency.

Easy to install.

Maximise your archive space by simply moving together all shelving units you do not need to access. Maxithek archive storage systems are available not only as stationary units but also as mobile shelving systems. The shelving units, including the mobile base system, can be installed quickly and easily in new buildings or retrofitted into existing facilities. This allows you to free up valuable floor space for new purposes or significantly increase the storage capacity of your existing archive.

Stationary.

Stationary shelving layout
100% capacity

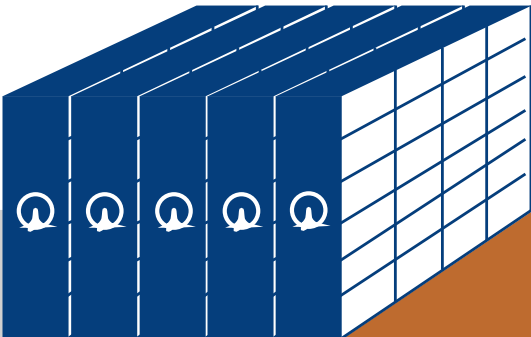

Mobile.

Mobile shelving system creates more space

Compared with a stationary shelving system:

- ✓ Same storage capacity
- ✓ More available floor space

AT LEAST
+ 51%

Variant 1

Mobile shelving maximises storage capacity

in comparisson to stationary solutions:

- ✓ Greater storage capacity
- ✓ The same floor space

UP TO
+ 231%

Variant 2

MANUAL OR ELECTRICALLY DRIVEN.

Impressive technology.

Zambelli mobile shelving systems combine outstanding ease of use with maximum flexibility for your archive or library. The units move smoothly, quietly, and without vibration, making them suitable for all types of archived materials. They allow even heavy loads to be moved effortlessly while providing flexible use of both storage space and room layout. Zambelli mobile shelving systems are available with either manual or electric drive. The manual system requires no electrical connection. The shelving units are opened smoothly and ergonomically using either a handwheel or a three-spoke drive wheel.

The electric drive system features powerful, virtually silent motors that open and close the shelving units quickly and efficiently. Optional control functions allow seamless integration into your building management system. Manual systems are operated using either an ergonomic handwheel or a three-spoke drive wheel.

Three-spoke handwheel

Handwheel

The advantages of electric operation

Our electrically operated mobile shelving systems are equipped with intelligent digital technology. They can be integrated with a wide range of control and communication systems, turning the shelving system into a central control hub. This enables our solutions to adapt to the way people work – not the other way around.

Safety comes first

All our electrically operated mobile shelving systems are equipped with sensor-controlled automatic stop technology to reliably prevent damage to property and injury during operation. Safety certified in accordance with DIN EN 15095.

Suitable for new and existing buildings!

The track system for our mobile shelving systems can be installed below floor level, integrated into the screed, or above floor level on an existing floor.

Control options:

- ▶ Control panel
- ▶ PC control
- ▶ Remote control
- ▶ Mobile App

Centralised control of:

- ▶ Lighting
- ▶ Shading
- ▶ Temperature
- ▶ Energy management

FAST ACCESS

Our electrically operated mobile shelving systems feature block movement technology. Instead of opening one shelving row after another in sequence, multiple rows move simultaneously. The result is minimal waiting time and maximum user convenience.

SPECIAL LIBRARY SOLUTIONS.

Where should the library stacks be located?

Many libraries lack suitable storage space for collections that are not intended for the open-access area. With Zambelli, even previously unused spaces – such as attic floors – can be transformed into efficient library stack areas. We develop shelving solutions that adapt to challenging room layouts, integrate double-tier installations and demonstrate how our mobile shelving systems can significantly increase storage capacity. The long-term preservation of historically significant library collections requires optimum storage conditions. The Zambelli Mediathek shelving system supports effective air circulation through its centre-post construction. Perforated end panels are also available to further improve ventilation. Where required, electrically operated systems can be equipped with integrated environmental controls, allowing temperature and humidity to be monitored at all times.

Preserving precious things.

For particularly valuable library collections, we recommend shelves with a special non-slip surface. This helps keep every item securely in place and protects it from damage. At the same time, the shelf coating remains smooth enough to allow for easy cleaning.

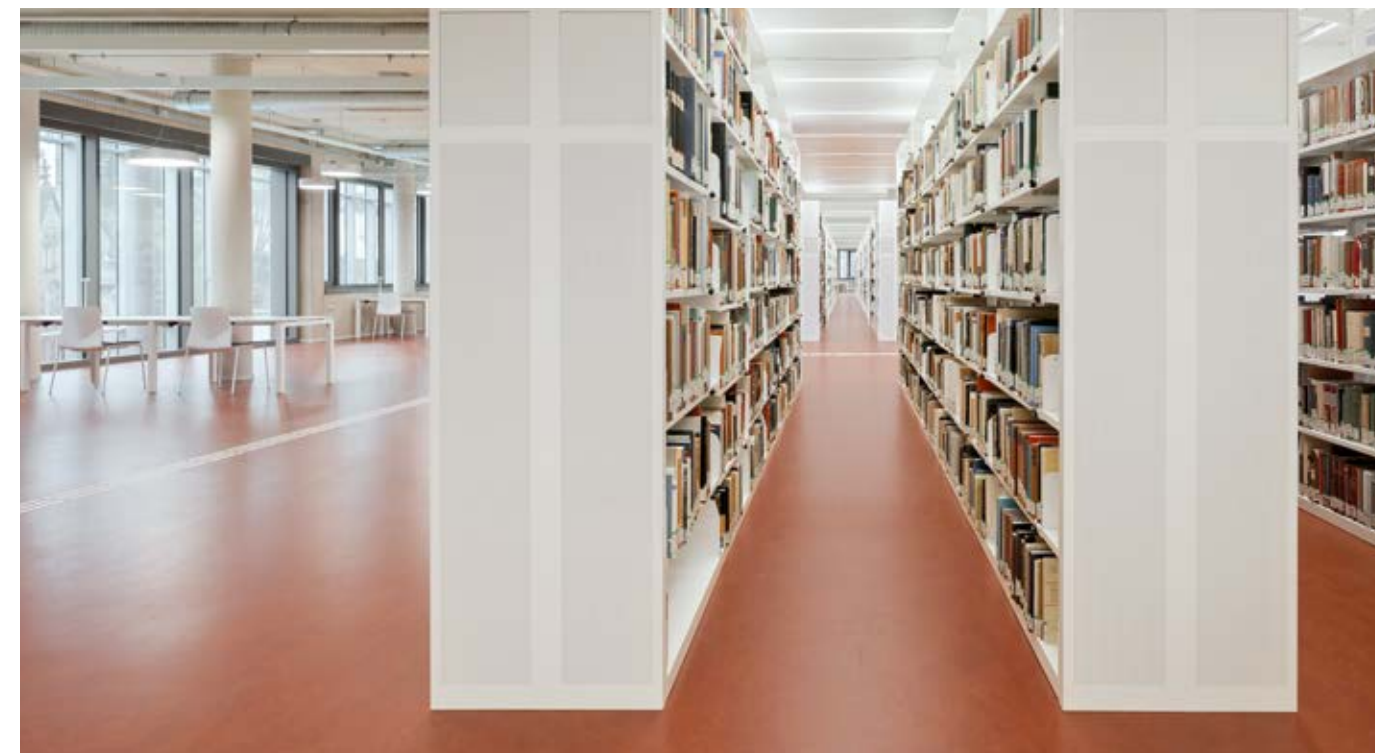

MODERN LIBRARY DESIGN.

Create an inviting space for communication.

Stepping into a library is like entering a world of its own – a world of knowledge shaped by continuity, yet constantly evolving. It is a place where learning, discovery and interaction come together. Make the most of this unique atmosphere to attract visitors and create an inspiring destination.

The Zambelli product range provides everything you need to create welcoming and communicative spaces within your library. Our shelving systems are remarkably versatile, enabling you to design a modern library that meets a wide variety of needs. From reading and study areas to workspaces and event spaces, Zambelli shelving systems form the foundation of multifunctional library interiors.

Perforated end panels create a subtle visual pattern.

The contemporary use of colour and the combination of fabric, wood and steel create an inviting browsing area.

Frames and end panels can be combined in any colour.

Furnishing elements such as magazine display units can be customised in a wide range of colours and materials to suit your individual requirements.

MODERN LIBRARY DESIGN.

Remarkably versatile.

The range of materials and surface finishes from Zambelli gives you the freedom to realise your own design vision. Whatever the architectural style, we offer library shelving systems to match. For new buildings, this provides the opportunity to create a library with a distinctive identity. When refurbishing existing buildings, you can enhance the character and atmosphere of the space. And if you are expanding an existing library, Zambelli shelving systems can be seamlessly integrated with the existing interior.

There are no limits to colour.

In addition to a wide range of standard colours, all RAL colours are available on request. We use only high-quality decorative powder coatings, offering excellent resistance to heat and light. The powder coating is applied only after all components have been fully formed, ensuring there are no exposed cut edges.
